UTILITY PERMIT REQUIREMENTS

1. All work conducted within the right-of-way (ROW) of in public easements shall be governed by all applicable articles of the "Standard Specifications of Road and Bridge Construction," and the current edition of the "Illinois Manual on Uniform Traffic Control Devices for Streets and Highways."
2. All disturbed areas shall be restored to original or better condition.
3. No tunneling under curbs, sidewalks, or aprons; only open cut or directional drilling will be allowed.
4. Replace full squares of sidewalk (5'X5'). No patching allowed.
5. Saw cut all sidewalks, curb and gutter, driveway aprons, and street patches to full depth before replacing.
6. Snow fences or steel plates shall be required on all open excavations. Plastic safety tape will not be allowed around open excavation as use for overnight protection.
7. Any deviation from a City approved permit, shall be approved before any work commences.
8. Street patching shall consist of trench backfill, compacted CA-6 to a depth of 6" below finished grade. 4" of HMA binder course and 2" of HMA surface course, Mix D, N50 or 6" of HMA surface course. The top surface lift shall be a minimum of 2" thick, level and to the grade of the adjacent surface.
9. Concrete pavement removal of any size shall be replaced according to IDOT Standard 442101 for a class B patch. This patch shall be saw cut full depth from the nearest contraction joint, to the next contraction joint. The concrete patch shall have the same thickness as the existing pavement. The ends of the existing pavement shall have NO. 10 dowel bars 18" long anchored into existing pavement on 12" centers in accordance with IDOT Standard 442101- 07.
10. Backfill trenches with compacted CA-6, when trench walls are within 2' of pavement, curb, driveway apron, or sidewalk.
11. If any debris is being tracked on the street by equipment and/ or vehicles, daily street sweeping will be required.
12. Install soil and erosion control protection to protect any open grated structures (i.e. catch basins, inlets, or manholes), within or adjacent to the project area that are near disturbed soil.
13. Illinois Department of Transportation (IDOT) lane closure required.
14. IDOT Permit required (where applicable).
15. Cook County Highway Department permit required (where applicable)
16. All work must be completed within easement, do not use private property.
17. Show all required easements on plans.
18. Contractor is responsible for providing pre-construction videos or photos.
19. Any work within the city's alleys must be restored using the city's standards. A detail of a typical and pervious concrete alley will be provided.
20. Notify surrounding businesses and/or residents one week before working near their property otherwise the permit will be considered null and void. Also send a copy of the notice to the City's Public Works and Engineering Department.
